Skills

Languages: JavaScript, TypeScript, Java, Python, C, C++
Frameworks & Libraries: React, Next.js, Angular, Node.js, Tailwind CSS
Backend & Tools: Firebase (Firestore, Authentication), Git, Nx, Linux
Security: RBAC Implementation, Secure Authentication (Firebase), Basic Threat Modeling

Work Experience

Team Lead — Student & Faculty Portal Development (Shine Portal) Apr 2025 – Present

- Developed a centralized academic monitoring portal used by **40+** faculty and **2500+** students to track compliance and assessment workflows.
- Implemented role-based dashboards supporting 4+ user roles with real-time tracking and notifications
- Implemented RBAC, secure authentication, and Firestore security rules (Google Cybersecurity Certificate).
- Automated verification workflows, reducing manual administrative effort by approximately **40–60%**.

Maz Software Solutions — Software Engineering Intern (Angular & Nx) Jan 2026 – Oct 2026

- Built modular Angular features in an Nx monorepo, reducing code conflicts across 3+ product streams.
- Integrated Angular services with backend REST APIs, cutting end-to-end data latency.
- Deployed on AWS and contributed to a CI/CD pipeline that cut manual release steps by 30%.

Projects

TaskMesh — Smart Workflow Assignment System Live Demo

- Built a workflow system that assigns client requests to employees based on capability and efficiency, balancing workloads with real-time oversight.
- Implemented role-based access with Firebase Auth and Firestore. Tech: Angular, TypeScript, Firebase.

HR Project Portal — Supabase & React

- Rebuilt a role-based portal on Supabase (PostgreSQL) and React with four roles: Admin, HR, Employee, and Intern.
- HR creates projects and teams; includes a team timeline, auto-generated IDs, and terminate-with-history so past records are kept.

Automated Quote Posting — n8n

- Built an n8n workflow that generates motivational quote images and posts them to Instagram automatically.

Web Vulnerability Scanner — Python CLI GitHub

- Detects SQL Injection, XSS and CSRF; generates HTML/JSON reports.

Education

Bachelor of Technology in Computer Science 2024 - 2028
SRM Institute of Science and Technology (SRMIST)
Relevant Coursework: Design and Analysis of Algorithms, Data Structures, DBMS, Operating Systems, Computer Networks

Awards & Certifications

- Thematic Award Winner — IDEATHON 2025 (SCRS USA @ FIU)
- Research Paper Presenter — ANTIC 2025 (Springer)
- OneEarth International Hackathon 2025 – Winner
- Google Cybersecurity Professional Certificate — Google (Feb 2026)
